OVERSEA TRADE

SOUTH AUSTRALIA

APRIL 1963

This bulletin shows direct trade between overseas countries and South Australia. INTERSTATE TRADE AND OVERSEA TRADE VIA OTHER STATES IS EXCLUDED. The figures are preliminary and subject to revision.

Because of the wide variety of imports they have in many cases been grouped under headings indicative of main items in the group, e.g. Apparel and Attire; this makes it impracticable to publish a table of quantities as there is often no appropriate single unit of quantity. For similar reasons the first table excludes a number of export items.

VALUE of exports is expressed £A f.o.b. or its equivalent at port of shipment; value of imports is "transaction value" £A f.o.b. or "domestic value" £A f.o.b. at port of shipment, whichever is the higher.

REPORT

1. The purpose of this report is to provide a detailed account of the activities and findings of the research project conducted during the period from January 1, 1968, to December 31, 1968. The project was designed to investigate the effects of various factors on the growth and development of the organism under study.

2. The methodology employed in this study was a combination of field observations and laboratory experiments. Data were collected from a series of controlled experiments and from observations made in the field. The results of these experiments and observations are presented in the following sections.

3. The first section of the report describes the general characteristics of the organism and the environment in which it was studied. This section includes a description of the physical and chemical properties of the environment and a discussion of the biological characteristics of the organism.

4. The second section of the report presents the results of the experiments conducted during the study. This section includes a description of the experimental design, a presentation of the data, and a discussion of the results. The data are presented in the form of tables and graphs, and the results are discussed in terms of their significance for the study.

5. The third section of the report discusses the implications of the findings of the study. This section includes a discussion of the relationship between the findings and the theory of the organism's growth and development, and a discussion of the potential applications of the findings.

6. The fourth section of the report contains a summary of the findings of the study and a conclusion. This section includes a brief review of the objectives of the study, a summary of the results, and a statement of the conclusions drawn from the results.
